At Datakode since 2024, I work on web applications for clients, from discussing the need through to deployment and follow-up. Before that, I spent ten years in the French Navy, seven of them as a weather and ocean forecaster: good training for explaining complex things clearly and working under pressure.

SKILLS

Laravel · Vue.js · Nuxt · Astro · TypeScript · SQL · Linux · Nginx · GitHub Actions · Docker · Scoping & client relations · Meteorology · Oceanography · Python

EXPERIENCE

Oct 2024 – present

Full-stack developer

Datakode — Auterive, France (permanent)

- End-to-end client web projects in a team of four
- Requirements and client relations: workshops, estimates, follow-up
- Design and development of Laravel, Vue.js and Nuxt applications
- Deployment, infrastructure, operations and user support

Mar – Aug 2024

Full-stack software engineer (internship)

Alteca — Toulouse

- Web application for inviting employees to company events (Angular, Python, GitLab)

2018 – 2023

Expert weather forecaster

Joint military weather support centre, French Navy — Toulouse

- Operational forecasts: numerical models, satellite and in situ data, time-critical decision briefings
- Remote weather support for deployed units
- VBA tools: automatic briefing generation from the weather server, daily production archiving, website data updates

2016 – 2018

Expert weather forecaster, embarked pool

Meteorological and oceanographic expertise centre, French Navy — Brest

- Forecasting at sea, joining a new crew on each mission
- Tailoring support to operational constraints

EDUCATION
